About the Authors

Pawel Kozlowski has over 15 years of professional experience in web development and was fortunate enough to work with variety of web technologies, languages, and platforms. He is not afraid of hacking both at client side and server side and always searches for the most productive tools and processes.

Pawel strongly believes in free, open source software. He has been very committed in the AngularJS project and also is very active in the AngularJS community. He also contributes to Angular UI – the companion suite to the AngularJS framework, where he focuses on the Twitter's Bootstrap directives for AngularJS.

When not coding, Pawel spreads a good word about AngularJS at various conferences and meetups.
